

## **RPM Green Solutions**

Sustainability is a path RPM Consolidated Services is familiar with. Attributes of this path include selection of alternative fuels and energy resources reducing our environmental impact. Many companies are unwilling or unable to make these commitments, as they challenge their financial futures or operating methods. Our continued investment in Sustainability is cause for great pride. Knowing these actions will benefit us for decades to come, we look forward to these challenges!

Our commitments to “Sustainability” are not only for fuels and resources, but in finding the most efficient means of managing our business while observing these initiatives. As we complete and create new initiatives, we will continue to provide sturdy and reliable service products which our clients have traditionally relied upon. Collectively, the commitments to sustainability displayed by RPM Consolidated Services benefit our company, our personnel, our clients and our environment.

## **What have we done and what is yet to come?**

+

=

Facility design & procurement, management of key processes & procedures reducing carbon output, increased operational efficiency of equipment, material purchases with verifiable and sustainable measures, and continued attention upholding our initiatives are only some of the steps we’ve taken towards our sustainable goals in the past 20 years. New technology, equipment and revised procedures will help see us through to the future. To this end, we must partner with personnel, customers and vendors who share these visions. We ask for, and look forward to, partnerships who commit themselves to a cleaner and more sustainable future where we are all benefactors.
